

Bangkok downgrades PV module exports

Bangkok downgrades PV module exports

On a humid day in February, a small group of workers huddled in front of a large solar panel factory inside Thailand's biggest manufacturing hub in the eastern coastal province of Chonburi, home to some of the world's top solar panel-producing companies. The men and women, mostly in their twenties, all hoped to land a job on a production line assembling solar cells into panels destined for export. They knew they may not hold the job for very long after reading complaints of former employees on social media about work being regularly cut when orders were low. But the company promised fair pay and, needing work, they were willing to take the risk. That risk is growing, as Thailand's solar industry has become caught in an escalating trade war between the US and China, with Thai solar workers paying the price. Large Chinese companies dominate Thailand's solar manufacturing industry, which produces solar cells and panels for export to the US market. But as Washington erects trade barriers to protect its homegrown solar sector from a rising tide of cheap Chinese imports, Thailand's industry is being squeezed. Solar manufacturers in Southeast Asia's second-largest economy that rely heavily on Chinese components are now facing nearly 400% tariffs to export their products to the US. Analysts say the tariffs threaten to hurt Thailand's manufacturing sector and its workers, and could have a knock-on impact on solar rollout in the country.

Strategic Trade Shifts In Thailand's Solar Export Industry 5 days ago Subject to a 37% Reciprocal Tariff Tax, Thailand's solar export industry, which depends heavily on the U.S. market, now confronts intensified trade pressures. This policy US tariffs threaten solar panel production and May 6,

On a humid day in February, a small group of workers huddled in front of a large solar panel factory inside Thailand's biggest Southeast Asia solar boom at risk from US-China trade stress Aug 21,

At least three -- including Longi Green Energy Technology Co and Trina Solar Co -- have scaled back operations in Thailand, Vietnam and Malaysia, which, along with Thailand Photovoltaic Market (-) Outlook Thailand's photovoltaic market witnessed a significant decline in imports from to , with a compound annual growth rate (CAGR) of -92.29%. This sharp decrease suggests a What will happen to Thailand's exports of Nov 3, KResearch views that in , Thailand's solar cell product exports to the U.S. might see a limited impact, thanks to the tariff Chinese solar giants rumored to shut Southeast Asian factories Jun 6, China's LONGi and Trina Solar - two of the world's three largest solar module manufacturers - have reportedly shut down production at their plants in Malaysia, Vietnam, US tariffs jeopardize Thailand's solar May 6,

With many Chinese companies relocating their operations to Southeast Asia to bypass U.S. tariffs on imported solar products, Thailand Sinovoltaics Southeast Asia SEA Solar Energy Supply Chain Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure. Operational capacities have been significantly reduced or temporarily halted, Solar squeeze: US tariffs threaten panel May 25, That risk is growing, with Thailand's solar industry now caught in an escalating trade war between the US and China, with Thai Solar Panel Industry in Thailand at Risk Due to US Tariffs May 6, Soon, Thailand's solar exports to the US soared. But
