Who is Changzhou Huawei electronics? Changzhou Huawei Electronics Co., Ltd. was founded in . It is a high-tech enterprise specialized in solid capacitors, chip capacitors, capacitor principles, product design and research, manufacturing and sales of a full range of aluminum electrolytic capacitor products. Is SMIC the 7 nm chip supplier for Huawei's new product? This study focuses on two significant news events: Huawei's new product release (Event 1) and another subsequent event - SMIC was exposed as the 7 nm chip supplier for Huawei's new product (Event 2). Why are Huawei & SMIC developing a new chip technology? Huawei and SMIC encounter challenges in manufacturing chips with advanced technology due to stringent US sanctions on chip and chip technology. Despite these obstacles, they have successfully developed new products utilising state-of-the-art chip technology (7 nm chips). What types of capacitors does HWE manufacture? HWE's product portfolio includes polymer solid capacitors, polymer hybrid capacitors, surface-mount capacitors, radial lead capacitors, snap-in capacitors, and screw terminal capacitors. These products are widely used in consumer electronics, industrial automation, automotive electronics, new energy, and power applications. Does Huawei have a chip supplier? Subsequently, Bloomberg () published news a few days later (September 4,), providing reliable information that the chip was manufactured by SMIC and supplied to Huawei (Event 2). Through Event 2, it became evident that Huawei has identified a chip supplier (SMIC) capable of ongoing chip supply (,). Why was Huawei banned from sourcing chip technology in the US? These sanctions, restricting Huawei from sourcing chip technology and equipment from certain high-tech companies in the US and its allies, necessitated an acceleration of the company's internal research, development, and production capabilities in the chip sector.
