

## New house solar panels

### New house solar panels

Should I buy a house with solar panels? Age, condition, maintenance needs and more are important and, if you're buying with a mortgage, solar panels can complicate matters. To help you consider a house with solar panels when you're buying we've put together an expert guide with all the details you need. There could be benefits to a house with solar panels. Should you buy a solar home if you're not the original owner? Solar will save almost all homeowners money, even if you're not the original owner. You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels. Why should you buy a solar-powered home? How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year. Should you buy a solar-equipped home? Home solar is more popular than ever, and if you're in the market for a new home, you might come across options with solar panels already installed. It's important to understand the unique aspects of buying a solar-equipped home so you can enjoy the benefits of solar energy without going through the installation process. What are the different types of solar home scenarios? You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels. Here's what you should know about each scenario. How much do solar panels cost? A DOE-funded study at the Lawrence Berkeley National Laboratory found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array.
