Can Australia help secure Tonga's outer island energy needs? Australia also has a long history of engagement in relation to helping secure Tonga's outer island energy needs. In the early 2000s, Australia funded the Ha'apai Outer Islands Electrification project (HOIEP), which involved the installation of diesel-powered generators and electrical reticulation on four islands in the Ha'apai group. How many people have access to electricity in Tonga? This means that little more than 30,000 people are spread across 35 islands, presenting acute issues in terms of the provision of modern infrastructure. At OIREP commencement, the ADB estimated that 89% of all households across Tonga had access to electricity. Will Ecos take on the post-project management of solar assets? While it had long been understood that TPL would take on this role, a decision was taken by the government mid that island-based Electricity Cooperative Societies (ECOS) would play the lead role in post-project management of solar assets, with support of MEIDECC.
