## Peak shaving cost of energy storage device

Can peak shaving reduce energy costs? Modern consumers actively seek cost-effective energy solutions and sustainable practices. This white paper explores peak shaving as an effective method to minimize energy costs. Energy and facility managers will gain valuable insights into how peak shaving applications can help unlock the full potential of energy storage systems. Is peak shaving energy storage a necessity? In an era of rising electricity costs, unpredictable peak demand charges, and growing pressure for energy independence, peak shaving energy storage is no longer a luxury—it's a necessity. What is peak shaving in power system? In the power system, the load usually shows "peak" and "valley" differences. It refers to the fact that the load is higher during certain times of the day and lower during other times of the day. In order to meet the peak demand, the power system needs to carry out peak-shaving. How does peak shaving work? Peak shaving can be accomplished by activating on-site power generation systems, such as diesel generators, or utilizing a battery energy storage system. During peak shaving, the consumer's overall electricity consumption remains consistent, but a portion of their demand is met through the BESS instead of drawing power from the grid. Does energy storage affect peak-shaving cost? On the other hand, references [35, 36] do not consider the impact of energy storage utilizing peak and off-peak electricity price arbitrage on the peak-shaving cost of the power system, thus failing to fully utilize the peak-shaving capabilities of energy storage. Will energy storage become the second largest peak-shaving resource? By , the scale of energy storage will expand rapidly, becoming the second largest peak-shaving resource in addition to thermal power units, as shown in Table 1. With the abundance of peak-shaving resources and the development of power auxiliary service market, the optimization of peak-shaving cost of power system has become an urgent problem.
