Prices of polysilicon solar panels in Southeast Asia

How much does polysilicon cost? In October when the polysilicon spot price was at US\$20.70/kg, GTM Research predicted that polysilicon pricing would "be stable and possibly even increase through , with pricing expected to be in the \$18 to \$24 per kilogram range." Does SunSirs sell polysilicon in China? China-based SunSirs publishes daily spot prices for 100 commodities, including polysilicon, in China. In our short guide on these four providers, we will focus on the polysilicon segment. Where can I find information on solar prices in Taiwan? Three Taiwanese market research firms provide weekly spot prices of the products in the solar value chain - solar-grade polysilicon, wafers, solar cells and panels - as well as background information on the price trend on their respective English websites: PVinsights, EnergyTrend and PV InfoLink. How did the polysilicon market change in Singapore in ? During the first quarter of , the polysilicon prices in Singapore reached 25 USD/KG in March. The market mirrored worldwide trends, albeit an overstock caused prices to decline. Slow demand and high production costs had an influence on the nation, which is a hub for solar makers. Why are polysilicon prices so high in Asia? In the Asia Pacific region, polysilicon prices were affected by strong demand from the solar photovoltaic manufacturing sector, particularly in China, India, and Southeast Asia. Capacity expansions in China increased overall supply, but periodic power curtailments and production halts in key provinces led to localized shortages. What is the global polysilicon market size? The global polysilicon market size reached USD 12 Billion in . By , IMARC Group expects the market to reach USD 25.1 Billion, at a projected CAGR of 8.70% during -. The increasing shift toward renewable energy sources, particularly solar power, has significantly impacted the polysilicon market.
